

DevOps Engineer

★ Luxfactory is an Economic Advisor and Innovation Partner
Active in Luxembourg and the greater region for more than 25 years, Luxfactory manages for its clients all implementation projects in 4 areas: IT and digitalization, renewable energies, strategy and digital marketing. ★

We're currently looking to expand our team in Luxembourg with a qualified **DevOps Engineer**. We are looking for someone who likes live communication as much as we do, but you can work from home once a week. Do you live in another country but considering moving to Luxembourg? We will do our best to help you.

Position Summary

As a team member of our client, you will contribute to the design, implementation, testing and maintenance of the new or existing building blocks composing the Software factory, in charge of CI and CD and including containerization capabilities and participate in the definition of the overall technical architecture.

You will also contribute to the production support for these applications.

Your Activities:

- Maintain, support and improve the Software Factory
- Update & Manage all the components: Jenkins, Gitlab, Nexus, Sonarqube, XLDeploy, XLRelease
- Extend the scope of the Software Factory by helping other teams to integrate their technologies into it
- Implement and work on automated pipelines (Continuous Integration / Continuous Testing / Continuous Delivery), quality gates and dashboards
- Provide support to Development Teams
- Implement applications, scripts or plugins to automate or extend the platform
- Maintain and support Redhat Openshift Container Platform
- Manage the platform: set up, cluster configuration & maintenance
- Provide support to Development Teams
- Maintain and support the ELK Platform
- Manage the platform: set up, maintenance and enhancements

LUXFACTORY

- Automate deployment / configuration process
- Provide support to Development Teams
- Participate in the technical architecture definition of the solutions owned by the DevOps Team
- Provide training on all our components

Qualifications

- Master's degree in computer science. A bachelor's degree with the expected experience is also accepted.
- You have 8+ years of "technology" background. An experience in a similar professional domain is considered as a strong added value.
- Previous experience in application development process (Java, .Net, Python) with a CI/CD process
- You demonstrate creativity and initiative while respecting team-work and common objectives.
- You are able to work in autonomy and take initiative
- You are rigorous and organized in your activities
- You do not hesitate to challenge solutions and provide your view
- You are expected to promptly address urgent request and you are effective in delivering within the agreed deadlines.
- Expertise in designing transversal components, Software Factory based components and technical architectures.
- Experience / Knowledge with packaging tools: Maven, NPM, ...
- Knowledge about containers and Kubernetes
- Shell Scripting experience (including scripting with Groovy and Shell).
- Tools: Gitlab, Maven, Jenkins, Nexus, SonarQube, Ansible Tower, XL Release, XL Deploy, ELK...
- Good knowledge about Git is an asset
- You are fluent in written and spoken English. French is a huge plus!

LUXFACTORY
